SUPPLEMENTAL DECLARATION OF RAYMOND S. HARTMAN
IN SUPPORT OF PLAINTIFFS' CLAIMS OF LIABILITY
AND CALCULATION OF DAMAGES:
ADDENDUM

I. Introduction and Overview

1. My name is Raymond S. Hartman. I have previously presented my qualifications to this Court and have submitted Affirmative and Rebuttal Declarations in Support of Class Certification and an Affirmative Declaration demonstrating liability and calculating damages for the Sub-Classes certified by Judge Saris in her August 16, 2005 *Memorandum and Order*.

2. In the course of my continuing analysis, I have calculated and will opine on a formulaic methodology for the calculation of Class-wide damages should the Court adopt a different approach to the definition of ASP. The formulaic methodology is identical to that presented in my December 15, 2005 Declaration on Liability and Damages, with the following adjustments.

- a) One manner to calculate the spread is that the AWP, and the ASP for which it is a signal, should summarize **all** non-governmental, non-*de minimis* transactions, rather than the subset included in my earlier analysis. Using this analysis, I have therefore recalculated the ASPs for all NDCs of all relevant drugs for all units dispensed through all providers other than governmental providers.
- b) Additionally, I have examined a scenario wherein the Medicare statutes were binding as to the reimbursement rate, when the AWP was one of the alternative bases. Assuming that providers should have been reimbursed at the lesser of the ASP (EAC) or the percentage (x%) of AWP prevailing at the particular time of the Damage Period, regardless of the amount by which $x\% \times \text{AWP}$ exceeded ASP. In this case, the proper measure of damages under Medicare reimbursement for Sub-Classes 1 and 2 was $(x\% \times \text{AWP} - \text{ASP})$ for all units reimbursed for the appropriate years.¹
- c) For Sub-Class 3 (payors of non-Medicare reimbursements), damages are calculated using the same formulaic methodologies for liability and damages as presented in December 15, 2005 Declaration; however, the ASPs calculated in 2.a) above are used in both the liability analysis and damage calculations.
- d) I calculate damage for the same units subject to my previous damage calculation.

¹ Specifically, as delineated in ¶¶ 63.a), 64.a) and 64.b) of my December 15, 2005 Declaration, in the damage calculation for single source drugs, $\Delta p_{jkt} = (\text{AWP}_{jkt} - \text{ASP}_{jkt})$, for $t = 1991-1997$ ($x\% = 100\%$) and $\Delta p_{jkt} = (95\% \times \text{AWP}_{jkt} - \text{ASP}_{jkt})$, for $t = 1998-2003$ ($x\% = 95\%$) for **all** j and k . For 2004, Δp_{jkt} is calculated as before.

In the damage calculation for multi-source drugs, $\Delta p_{jkt} = (\text{AWP}_{jkt} - \text{ASP}_{jkt})$, for $t = 1991$; $\Delta p_{jkt} = (\text{Median generic AWP} - \text{ASP}_{jkt})$, for $t = 1992-1997$; and $\Delta p_{jkt} = (95\% \times \text{Minimum}\{\text{Median generic AWP, lowest branded AWP}\} - \text{ASP}_{jkt})$, for $t = 1998-2003$; for **all** j and k . For 2004, Δp_{jkt} is calculated as before.

II. Summary of Estimated Class-Wide Damages

3. For each Track One Defendant, I have recalculated the ASPs and gathered the data on the AWP's required to determine damages under Medicare reimbursement and causation, liability and damages under non-Medicare reimbursement. The aggregate Class-wide damages calculated subject to these new assumptions are summarized in Table 1, overall and for each Track One Defendant.

Table 1.a: Summary of Damages (Nominal \$)

Company	Medicare Beneficiaries	Medicare Third-Party Payors		Non-Medicare, TPPs and Consumers	
	Massachusetts (Sub-Class 1)	National	Massachusetts (Sub-Class 2)	National	Massachusetts (Sub-Class 3)
AstraZeneca	\$36,533,001	\$182,665,007	\$4,828,389	\$262,093,594	\$6,927,928
Bristol Myers-Squibb	\$37,089,439	\$185,447,194	\$4,901,931	\$176,980,250	\$4,678,124
GlaxoSmithKline	\$14,165,821	\$70,829,104	\$1,872,228	\$434,879,189	\$11,495,174
Johnson & Johnson	\$57,247,772	\$286,238,860	\$7,566,160	\$148,675,079	\$3,929,933
Schering-Plough	\$42,182,014	\$210,910,071	\$5,574,992	\$52,790,155	\$1,395,404

Table 1.b: Summary of Damages with Pre-Judgment Interest (2005 \$)

Company	Medicare Beneficiaries	Medicare Third-Party Payors		Non-Medicare, TPPs and Consumers	
	Massachusetts (Sub-Class 1)	National	Massachusetts (Sub-Class 2)	National	Massachusetts (Sub-Class 3)
AstraZeneca	\$43,987,765	\$248,209,575	\$6,560,931	\$310,598,706	\$8,210,065
Bristol Myers-Squibb	\$49,676,672	\$300,993,867	\$7,956,180	\$217,023,500	\$5,736,589
GlaxoSmithKline	\$18,873,631	\$113,987,735	\$3,013,041	\$547,932,751	\$14,483,522
Johnson & Johnson	\$67,408,620	\$375,194,898	\$9,917,538	\$169,783,884	\$4,487,902
Schering-Plough	\$55,326,393	\$329,534,888	\$8,710,605	\$74,079,517	\$1,958,146

4. In Attachment A, I summarize the revised damage calculations for all five Track One Defendants, for the three Sub-Classes and for the U.S. as a whole for those entities included in Sub-Classes 2 and 3. To briefly summarize, I find the following:

- a) Attachments A.1 through A.5 summarize my calculations of damages for all those drugs of each of the five Track One Defendants whose AWP's were artificially inflated. For each Defendant, the amount of damages for Sub-Class 1 is the largest, given the fact that this Sub-Class is national. The damages to Sub-Classes 2 and 3 are smaller, since these damages involve reimbursement for drugs administered in Massachusetts only. The damage calculations by Sub-Class are presented in nominal dollars (that is, summing the damages for all years) and in constant dollars (that is, allowing for pre-judgment interest) which takes account

of the fact that compensation for damages that occurred in the early years of the Damage Period is worth more today than it was in those early years.

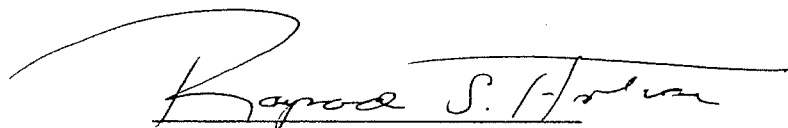

These damage summaries also appear in Table 1 above.

- b) The damages for AstraZeneca (AZ, in Attachment A.1) involve 2 drugs, Pulmicort and Zoladex. Eight BMS drugs are subject to damages (Attachment A.2). Ten GSK drugs are subject to damages (Attachment A.3). Two J&J drugs are subject to damages (Attachment A.4), and five Schering-Plough (S-P) drugs are subject to damages (Attachment A.5).
- c) The supporting Tables to each of these five summary Tables appear in Attachments A.1.a) to A.1.j) through A.5.a) to A.5.j) respectively. For example, for AZ:
 - Attachment A.1.a) calculates damages by NDC by year for Sub-Class 1;
 - Attachment A.1.b) aggregates those damages to the drug level for Sub-Class 1;
 - Attachment A.1.c) calculates damages by NDC to all TPPs nationally for reimbursement of Medicare supplemental coinsurance;
 - Attachment A.1.d) aggregates those damages to the drug level for all TPPs nationally for reimbursement of Medicare supplemental coinsurance;
 - Attachment A.1.e) disaggregates from the national damages those damages by NDC to all TPPs for reimbursement in Massachusetts of Medicare supplemental coinsurance (that is, Sub-Class 2);
 - Attachment A.1.f) aggregates those damages by NDC to the drug level for Sub-Class 2;
 - Attachment A.1.g) calculates damages by NDC to all TPPs and consumers nationally for reimbursement of non-Medicare claims;
 - Attachment A.1.h) aggregates those damages to the drug level for all TPPs and consumers nationally for reimbursement of non-Medicare claims;
 - Attachment A.1.i) disaggregates from the national damages those damages by NDC to all TPPs and consumers for reimbursement of non-Medicare claims in Massachusetts (that is, Sub-Class 3);
 - Attachment A.1.j) aggregates those damages by NDC to the drug level for Sub-Class 3.
- d) Attachment A.2.a) to A.2.j) through A.5.a) to A.5.j) present analogous information for the other four Defendants.
- e) The formats of the supporting tables to each Summary Table may differ somewhat given the fact that the data received from each Defendant differed in format and content to some degree. The extent to which such differences occur is clarified in the notes to the Tables, which are present as Attachment A.6.

- f) The data used for identifying total Class units and disaggregating them into the relevant Sub-Classes have not changed from my December 15, 2005 Declaration, which are described in Attachment J.7 to that Declaration.

I declare under penalty and perjury that this Declaration is true and correct.

Executed on February 3, 2006

A handwritten signature in black ink, appearing to read "Raymond S. Hartman", with a large, sweeping initial "R" and a horizontal line extending from the end of the signature.

Raymond S. Hartman

Attachment A.6

Attachment A.6: Damages Calculation Notes and Assumptions – Addendum**Medicare Copay Damages to Beneficiaries (Sub-Class 1)**

- Damages formula from 1991 to 2003: $((1 - x\%) * AWP - ASP) * Units * Medicare Share$.
- Damages formula in 2004: $(1 - x\%) * (AWP - 1.30 * ASP) * Units * Medicare Share$.
- “x” refers to the statutory discount off of AWP. From 1991 to 1997, $x = 0\%$. From 1998 to 2003, $x = 5\%$. In 2004, $x = 15\%$ (or the appropriate percentage for each drug; see Federal Register, Volume 69, No. 4, Wednesday, January 7, 2004, Rules and Regulations, p. 1250, Addendum F: “2004 Payment Limits for Part B Drugs Not Paid on a Cost or Prospective Payment Basis”). The AWP and ASPs in the 2004 calculation refer to the AWP and ASPs in 2003.
- The AWP for multi-source drugs was determined as follows (see ¶ 63.b in the Declaration):
 - From 1992 to 1997, the AWP used was the median generic AWP
 - From 1998 to 2004, the AWP used was the lower of (a) the lowest brand AWP or (b) the median generic AWP
- See Attachment J.7 for calculations of the Medicare share of payments.
- For any NDC and year where the annual spread was below the yardstick (30%), damages were not calculated. Otherwise, damages are calculated using the formulas above.
- The percentage of the Medicare copay paid by beneficiaries was assumed to be 13.8%. Source: F.J. Eppig and G.S. Chulis, “Trends in Medicare Supplementary Insurance: 1992-96,” *Health Care Financing Review*, 19(1), 1997. Refer to Table 1, column “Percent of FFS.” The out-of-pocket beneficiary percentage (13.8%) is equal to “Medicare Only” (13.0%) plus “SLMBs” (0.8%).
- Pre-judgment interest was calculated in 2005\$ for Medicare Beneficiary damages using the average 1-year U.S. Treasury Nominal rate, 1991-2004 (source: <http://www.federalreserve.gov>).

Medicare Copay Damages to Private Third-Party Payers (Sub-Class 2)

- See the first six bullet points above.
- The percentage of the Medicare copay paid by private third-party payers was assumed to be 69%. This is equal to 100% minus the beneficiary percentage, minus the Medicaid percentage. The Medicaid percentage (17.2%) is equal to “Full Coverage” (9.1%) plus “QMBs” (8.1%). Source: *Ibid*.
- Allocation of damages to the state of Massachusetts was based on 2.64% of the national damages. Source: Kaiser Family Foundation, State Health Facts website (www.statehealthfacts.org), Total Retail Sales for Prescription Drugs Filled at Pharmacies, 2003.

- Pre-judgment interest was calculated in 2005\$ for Medicare TPP damages using the average Prime Bank Loan rate, 1991-2004 (source: <http://www.federalreserve.gov>).

Non-Medicare Damages (Sub-Class 3)

- Damages formula: $(1 - x\%) * (\text{Spread} - \text{Yardstick}\%) * \text{ASP} * \text{Units} * \text{Non-Medicare Share}$.
- “x” refers to the discount off of AWP. This is assumed to be 2.5%. Source: based upon survey data in the June 2003 Report to the Congress by MedPAC (Medicare Payment and Advisory Commission), entitled *Variation and Innovation in Medicare*.
- The spread is calculated annually and is equal to $(\text{AWP} - \text{ASP}) / \text{ASP}$.
- The yardstick was set to 30%.
- Where the spread is less than the yardstick (30%), damages are set equal to zero.
- NDCs that are not physician administered were flagged and excluded.
- See Attachment J.7 for calculations of the non-Medicare share of payments.
- Allocation of damages to the state of Massachusetts was based on 2.64% of the national damages. Source: Kaiser Family Foundation, State Health Facts website (www.statehealthfacts.org), Total Retail Sales for Prescription Drugs Filled at Pharmacies, 2003.
- Pre-judgment interest was calculated in 2005\$ for Non-Medicare damages using the average 1-year U.S. Treasury Nominal rate, 1991-2004 (source: <http://www.federalreserve.gov>).
- Non-Medicare damages were set equal to 0 for all multi-source drugs (starting one year after generic entry). This includes:
 - Bristol-Myers Squibb: Blenoxane (1996), Cytosin Tabs (2000), Cytosin Inj. (2004), Rubex (1990), Taxol (2001) and Vepesid (1994).
 - GlaxoSmithKline: Lanoxin (1995), Navelbine (2003), Ventolin (1992) and Zovirax (1997).
 - Schering-Plough: Albuterol (1992) and Proventil (1992).
- Non-Medicare damages were set equal to 0 for all self-administered oral tablets, capsules and solutions. This includes NDCs for the following:
 - Bristol-Myers Squibb: Cytosin and Vepesid.
 - GlaxoSmithKline: Alkeran, Kytril, Myerlan and Zofran.
 - Schering-Plough: Perphenazine and Temodar.

Extrapolations Due to Missing Manufacturer Transaction Data

- AstraZeneca
 - Zoladex data were provided through 2002. Thus, 2003 and 2004 damages are calculated based on a linear extrapolation of the damages from 1998-2002.
- Bristol-Myers Squibb
 - Blenoxane: 1991-1992 damages were set equal to the average damages from 1993-1995; 2003 Medicare damages were set equal to the average damages from 2000-2002.
 - Cytosan: 1991-1992 damages were set equal to the damages from 1993; 2003 Medicare damages were set equal to the average damages from 2000-2002.
 - Paraplatin: 1991-1992 damages were set equal to the average damages from 1993-1995; 2003-2004 damages were set equal to the average damages from 2001-2002.
 - Rubex: 1991-1993 Medicare damages were set equal to the damages for 1994; 2003 Medicare damages were set equal to the average damages from 2000-2002.
 - Taxol: 2003 Medicare damages were set equal to the average damages from 2001-2002.
 - Vepesid: 1991-1992 damages were set equal to the damages from 1993; 2003 Medicare damages were set equal to the average damages from 2000-2002.
- GlaxoSmithKline
 - *Medicare Damages:*
 - Alkeran: 2003 and 2004 damages were set equal to the average damages from 2000-2002.
 - Imitrex: 1993-1996 damages were set equal to the average damages from 1997-1999; 2003 and 2004 damages were set equal to the average damages from 2000-2002.
 - Lanoxin: 1991-1996 damages were set equal to the average damages from 1997-1999; 2003 damages were set equal to the average damages from 2000-2002.
 - Myleran: 1991-1996 damages were set equal to the average damages from 1997-1999; 2003 and 2004 damages were set equal to the average damages from 2000-2002.
 - Navelbine: 1995 and 1996 damages were set equal to the damages from 1997-1999; 2003 damages were set equal to the average damages from 2000-2002.
 - Retrovir: 1991-1996 damages were set equal to the average damages from 1997-1999; 2003 and 2004 damages were set equal to the average damages from 2000-2002.
 - Zofran: 2004 damages were set equal to the average damages from 2001-2003.

- Zovirax: 1991-1996 damages were set equal to the average damages from 1997-1999; 2003 damages were set equal to the average damages from 2001-2002.
- *Non-Medicare Damages:*
- Alkeran: 2003 and 2004 damages are set equal to the average damages from 2000-2002.
- Imitrex: 1993-1996 damages are set equal to the average damages from 1997-1999; 2003 and 2004 damages are set equal to the average damages from 2000-2002.
- Navelbine: 1995 and 1996 damages are set equal to 1997 damages; 2003 and 2004 damages are set equal to the average damages from 2000-2002.
- Zofran: 2004 damages are set equal to the average damages from 2002-2003.
- Johnson & Johnson
 - *Medicare Damages:*
 - Procrit: 2004 damages were set equal to the average damages from 2001-2003.
 - Remicade: 2004 damages were set equal to the average damages from 2001-2003.
 - *Non-Medicare Damages:*
 - Procrit: 2004 damages were set equal to the damages from 2003.
 - Remicade: 2004 damages were set equal to the average damages from 2001-2003.
 -
- Schering-Plough
 - For all drugs, 2004 damages were set equal to four times the damages calculated for 2004Q1.

Additional Addendum Notes

- BMS
 - Rebates paid to hospitals and GPOs from Deposition of Michelle Hand, Exhibit 15 ("sapchecks.xls"): These rebates have been incorporated into the ASP calculation as follows. Annual totals were obtained using the "Check Issued" field for Blenoxane, Paraplatin, Taxol and "Paraplatin/Taxol". Next, unit weights by year and by NDC were calculated using net units (i.e., units minus excluded units from the indirect database) used in the ASP calculation. These weights were used to allocate the rebates across NDCs for Blenoxane, Paraplatin and Taxol respectively. A separate set of weights were calculated in the same way for Taxol and Paraplatin combined. These weights were used to allocate the "Paraplatin/Taxol" rebates across both Paraplatin and Taxol. All customer names were included.
 - Though other BMS rebate data exist, not enough information was obtained through discovery to make use of them. Therefore, they have not been

incorporated in this analysis.

- Customer classes of trade
 - Complete lists of classes of trade excluded from the ASP analysis are included in the SAS program work papers accompanying this Declaration.
